CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 82 (1992)

Adduct, nitrosonitrobenzene, glutathione, semimercaptal, 151
S-Adenosylmethionine, hemoglobin adducts, twin studies, tobacco smoke, heritability 91
Analytical aspects, bio-monitoring, free radical damage, in vivo, oxidative stress, 243
Anticancer activity, CC-1065 (antitumor antibiotic), DNA binding, thermal melting, circular dichroism, toxicity, 31
Antioxidants, thiols, copper (II), oxyhemoglobin, methemoglobin, 209
Arylazides, arylnitrenium ions, heterocyclic aromatic amines, sister chromatid exchange, mammalian cells, 123
Arylnitrenium ions, arylazides, heterocyclic aromatic amines, sister chromatid exchange, mammalian cells, 123

Benzo[*a*]pyrene, flavonoids, benzo[*a*]pyrene metabolism, structure-activity relationship, chemoprevention, 181
Benzo[*a*]pyrene metabolism, benzo[*a*]pyrene, flavonoids, structure-activity relationship, chemoprevention, 181
Bio-monitoring, free radical damage, in vivo, analytical aspects, oxidative stress, 243
Bladder metabolism, *N*-nitrosobutyl(4-hydroxybutyl)amine, *N*-nitrosobutyl(3-carboxypropyl)amine, liver, metabolism, carcinogens, 231
Bound residue, ronidazole, 5-nitroimidazole, carboxymethylcysteine, 21

Carboxymethylcysteine, ronidazole, 5-nitroimidazole, bound residue, 21
Carcinogens, *N*-nitrosobutyl(4-hydroxybutyl)amine, *N*-nitrosobutyl(3-carboxypropyl)amine, bladder metabolism, liver, metabolism, 231
CC-1065 (antitumor antibiotic), DNA binding, thermal melting, circular dichroism, toxicity, anticancer activity, 31
Cell death, glutathione, oxyradicals, metallothionein, hydrogen peroxide, 99
Chemoprevention, benzo[*a*]pyrene, flavonoids, benzo[*a*]pyrene metabolism, structure-activity relationship, 181
Circular dichroism, CC-1065 (antitumor antibiotic), DNA binding, thermal melting, toxicity, anticancer activity, 31
Cisplatin, cytoskeleton, α-tubulin, cytokeratin, tumor cells, immunofluorescence microscopy, 295
Colorectal cancer, mucin, dinitropyrene-DNP, dietary fibre, 219
Copper (II), thiols, oxyhemoglobin, methemoglobin, antioxidants, 209
Covalent binding, perfluorodecanoic acid, perfluorooctanoic acid, peroxisome proliferation, liver, testis, plasma, 317
Covalent binding, trinitrotoluene, hemoglobin adduct, metabolism, 1
Cytokeratin, cytoskeleton, α-tubulin, cisplatin, tumor cells, immunofluorescence microscopy, 295
Cytoskeleton, α-tubulin, cytokeratin, cisplatin, tumor cells, immunofluorescence microscopy, 295

Damage, RSU 1069, DNA; repair, 55
Dietary fibre, mucin, dinitropyrene-DNP, colorectal cancer, 219
Dinitropyrene-DNP, mucin, dietary fibre, colorectal cancer, 219
DNA binding, CC-1065 (antitumor antibiotic), thermal melting, circular dichroism, toxicity, anticancer activity, 31
DNA damage, Tris-BP, organ specificity, metabolism, isolated cells, 195
DNA, RSU 1069, damage, repair, 55
DNase activity, nitrofurantoin, in vitro, viscosity, 111

Electrochemical and NMR measurements, glyoxylic compounds, theoretical electron affinity evaluations, radiosensitization correlation, 47

Erythrocyte membrane, melittin, lipid-protein interaction, spin labelling, fluorescence polarization, fluorescence quenching, 135

Flavonoids, benzo[*a*]pyrene, benzo[*a*]pyrene metabolism, structure-activity relationship, chemoprevention, 181
Fluorescence polarization, melittin, lipid-protein interaction, erythrocyte membrane, spin labelling, fluorescence quenching, 135
Fluorescence quenching, melittin, lipid-protein interaction, erythrocyte membrane, spin labelling, fluorescence polarization, 135
Free radical damage, bio-monitoring, in vivo, analytical aspects, oxidative stress, 243
Free radicals, *p*-phenylenediamines, muscle necrosis, mitochondria, 165

Glutathione, nitrosonitrobenzene, adduct, semimercaptal, 151
Glutathione, oxyradicals, metallothionein, hydrogen peroxide, cell death, 99
Glyoxylic compounds, theoretical electron affinity evaluations, electrochemical and NMR measurements, radiosensitization correlation, 47

Hemoglobin adduct, trinitrotoluene, metabolism, covalent binding, 1
Hemoglobin adducts, *S*-adenosylmethionine, twin studies, tobacco smoke, heritability, 91
Heritability, hemoglobin adducts, *S*-adenosylmethionine, twin studies, tobacco smoke, 91
Heterocyclic aromatic amines, arylazides, arylnitrenium ions, sister chromatid exchange, mammalian cells, 123
HPLC, spin trap, lipoxygenase, linoleic acid, α-(4-pyridyl-1-oxide-*N*-*tert*-butylnitrone), isolation and characterization, mass spectra, 73
Hydrogen peroxide, glutathione, oxyradicals, metallothionein, cell death, 99

Immunofluorescence microscopy, cytoskeleton, α-tubulin, cytokeratin, cisplatin, tumor cells, 295
In vitro, nitrofurantoin, DNase activity, viscosity, 111
In vivo, bio-monitoring, free radical damage, analytical aspects, oxidative stress, 243
Isolated cells, Tris-BP, DNA damage, organ specificity, metabolism, 195
Isolation and characterization, spin trap, lipoxygenase, linoleic acid, α-(4-pyridyl-1-oxide-*N*-*tert*-butylnitrone), HPLC, mass spectra, 73

Linoleic acid, spin trap, lipoxygenase, α-(4-pyridyl-1-oxide-*N*-*tert*-butylnitrone), HPLC, isolation and characterization, mass spectra, 73
Lipid-protein interaction, melittin, erythrocyte membrane, spin labelling, fluorescence polarization, fluorescence quenching, 135
Lipoxygenase, spin trap, linoleic acid, α-(4-pyridyl-1-oxide-*N*-*tert*-butylnitrone), HPLC, isolation and characterization, mass spectra, 73
Liver, *N*-nitrosobutyl(4-hydroxybutyl)amine, *N*-nitrosobutyl(3-carboxypropyl)amine, bladder metabolism, metabolism, carcinogens, 231
Liver, perfluorodecanoic acid, perfluorooctanoic acid, covalent binding, peroxisome proliferation, testis, plasma, 317

Mammalian cells, arylazides, arylnitrenium ions, heterocyclic aromatic amines, sister chromatid exchange, 123
Mass spectra, spin trap, lipoxygenase, linoleic acid, α-(4-pyridyl-1-oxide-*N*-*tert*-butylnitrone), HPLC, isolation and characterization, 73
Melittin, lipid-protein interaction, erythrocyte membrane, spin labelling, fluorescence polarization, fluorescence quenching, 135
Metabolism, microsomes, nitro-naphto-furan, mutagenicity, 329
Metabolism, *N*-nitrosobutyl(4-hydroxybutyl)-amine, *N*-nitrosobutyl(3-carboxypropyl)-amine, bladder metabolism, liver, carcinogens, 231
Metabolism, Tris-BP, DNA damage, organ specificity, isolated cells, 195
Metabolism, trinitrotoluene, hemoglobin adduct, covalent binding, 1
Metallothionein, glutathione, oxyradicals, hydrogen peroxide, cell death, 99
Methemoglobin, thiols, copper (II), oxyhemoglobin, antioxidants, 209
Microsomes, metabolism, nitro-naphto-furan, mutagenicity, 329
Mitochondria, *p*-phenylenediamines, muscle necrosis, free radicals, 165
Mucin, dinitropyrene-DNP, dietary fibre, colorectal cancer, 219
Muscle necrosis, *p*-phenylenediamines, mitochondria, free radicals, 165
Mutagenicity, metabolism, microsomes, nitro-naphto-furan, 329

N-nitrosobutyl(3-carboxypropyl)amine, *N*-nitrosobutyl(4-hydroxybutyl)amine, bladder

metabolism, liver, metabolism, carcinogens, 231
N-nitrosobutyl(4-hydroxybutyl)amine, *N*-nitrosobutyl(3-carboxypropyl)amine, bladder metabolism, liver, metabolism, carcinogens, 231
Nitro-naphto-furan, metabolism, microsomes, mutagenicity, 329
Nitrofurantoin, in vitro, DNase activity, viscosity, 111
5-Nitroimidazole, ronidazole, carboxymethylcysteine, bound Residue, 21
Nitrosonitrobenzene, glutathione, adduct, semimercaptal, 151

Organ specificity, Tris-BP, DNA damage, metabolism, isolated cells, 195
Oxidative stress, bio-monitoring, free radical damage, in vivo, analytical aspects, 243
Oxyhemoglobin, thiols, copper (II), methemoglobin, antioxidants, 209
Oxyradicals, glutathione, metallothionein, hydrogen peroxide, cell death, 99

Perfluorodecanoic acid, perfluorooctanoic acid, covalent binding, peroxisome proliferation, liver, testis, plasma, 317
Perfluorooctanoic acid, perfluorodecanoic acid, covalent binding, peroxisome proliferation, liver, testis, plasma, 317
Peroxisome proliferation, perfluorodecanoic acid, perfluorooctanoic acid, covalent binding, liver, testis, plasma, 317
p-phenylenediamines, muscle necrosis, mitochondria, free radicals, 165
Plasma, perfluorodecanoic acid, perfluorooctanoic acid, covalent binding, peroxisome proliferation, liver, testis, 317
α-(4-Pyridyl-1-oxide-*N*-*tert*-butylnitrone), spin trap, lipoxygenase, linoleic acid, HPLC, isolation and characterization, mass spectra, 73

Radiosensitization correlation, glyoxylic compounds, theoretical electron affinity evaluations, electrochemical and NMR measurements, 47
Repair, RSU 1069, DNA, damage, 55
Ronidazole, 5-nitroimidazole, carboxymethylcysteine, bound residue, 21
RSU 1069, DNA, damage, repair, 55

Semimercaptal, nitrosonitrobenzene, glutathione, adduct, 151
Sister chromatid exchange, arylazides, arylnitrenium ions, heterocyclic aromatic amines, mammalian cells, 123
Spin labelling, melittin, lipid-protein interaction, erythrocyte membrane, fluorescence polarization, fluorescence quenching, 135
Spin trap, lipoxygenase, linoleic acid, α-(4-pyridyl-1-oxide-*N*-*tert*-butylnitrone), HPLC, isolation and characterization, mass spectra, 73
Structure-activity relationship, benzo[*a*]pyrene, flavonoids, benzo[*a*]pyrene metabolism, chemoprevention, 181

Testis, perfluorodecanoic acid, perfluorooctanoic acid, covalent binding, peroxisome proliferation, liver, plasma, 317
Theoretical electron affinity evaluations, glyoxylic compounds, electrochemical and NMR measurements, radiosensitization correlation, 47
Thermal melting, CC-1065 (antitumor antibiotic), DNA binding, circular dichroism, toxicity, anticancer activity, 31
Thiols, copper (II), oxyhemoglobin, methemoglobin, antioxidants, 209
Tobacco smoke, hemoglobin adducts, *S*-adenosylmethionine, twin studies, heritability 91
Toxicity, CC-1065 (antitumor antibiotic), DNA binding, thermal melting, circular dichroism, anticancer activity, 31
Trinitrotoluene, hemoglobin adduct, metabolism, covalent binding, 1
Tris-BP, DNA damage, organ specificity, metabolism, isolated cells, 195
α-Tubulin, cytoskeleton, cytokeratin, cisplatin, tumor cells, immunofluorescence microscopy, 295
Tumor cells, cytoskeleton, α-tubulin, cytokeratin, cisplatin, immunofluorescence microscopy, 295
Twin studies, hemoglobin adducts, *S*-adenosylmethionine, tobacco smoke, heritability, 91

Viscosity, nitrofurantoin, in vitro, DNase activity, 111
